

The Creative Curriculum® Kits for Infants, Toddlers & Twos

Playing With Toys

Each of our curriculum kits for infants, toddlers, and twos is designed to support a specific classroom experience. This kit has a wide variety of materials specially chosen to support young children's play.

Young children learn best through play and the materials in this kit provide opportunities for many types of learning. From stacking and nesting blocks to putting together puzzles and using tools, all areas of development can be supported. Store these materials on a low shelf that is easily accessible to children. And encourage them to use all of the toys and materials in new and interesting ways. For example, children can match the color of the cars to the color of the car garages or they can stack or nest the boxes from largest to smallest. With a little imagination, the possibilities are endless.
