

How to Use the *GOLD*® Documentation App on Android Devices

Teachers can use the *GOLD*® Documentation app to easily capture documentation in the moment, using an Android mobile device. The app also allows teachers to set preliminary levels directly from the app, allowing for a more complete documentation process on the app and less back-and-forth between the app and *MyTeachingStrategies*®.

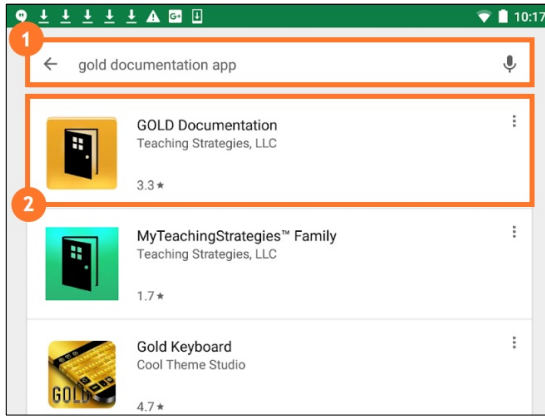

Please note: Screenshots show the app on a Lexus Nexus 7. Other Android devices will have similar screens and buttons.
