

## Drive differentiated, effective instruction through embedded whole-child assessment.

All Kindergarten and Transition to Kindergarten (TK) teachers in Washington State have access to *GOLD*® to complete the WaKIDS Whole-child Assessment component of the WaKIDS process. *GOLD*® may be accessed continually throughout the school year, and the data may be used to inform instructional decisions as well as communicate student progress to families.

### Funded through OSPI

For all Kindergarten and TK Classrooms

# GOLD®

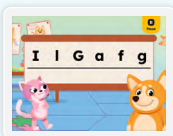

This digital, ongoing, observation-based assessment tool helps teachers determine each child's abilities, track children's progress, and intentionally plan appropriate learning experiences.

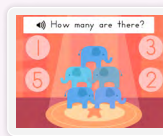

- **Seamlessly blend curriculum and ongoing formative assessment** digitally through hundreds of *Intentional Teaching Experiences* and *Mighty Minutes*®, including for mathematics and literacy learning and social-emotional development.
- **Smart Suggestions** shorten the time it takes teachers to finalize their checkpoints by up to 80%.
- **Add documentation directly from digital forms** (Alphabet Knowledge, Number Concepts, and Shapes).
- Streamline your process to capture documentation and communicate with families using the **SmartTeach® Mobile App**.
- Invite families to engage in 2-way communication using the **Family App** and convert family shares into documentation.
- **Complete the Interrater Reliability Certification process** to ensure the accuracy and consistency of your ratings.
- **Generate a variety of reports** to inform instruction, individualize learning, and share progress with families.

## Additional solutions districts may purchase for Kindergarten and TK Classrooms

### Game-Based Assessment

**Literacy screener**  
to help identify  
reading challenges early,  
including dyslexia

**Formative games**  
to directly capture  
developmental progress

Save teachers time and get a fuller picture of each child's developmental progress by adding **Finch™** game-based assessment to our industry-leading **GOLD®** observational assessment.

**GOLDFinch™** brings together **GOLD®** observational assessment with new game-based formative assessments and a literacy screener that capture data directly from children. Together, they offer a fuller picture of each child's development to drive individualized, developmentally appropriate learning.
